

AISHWARYA SUBRAYA BHANDARI

Software Development Engineer | Java & Full Stack

Bengaluru, Karnataka, India | +91 7411465781 | aishwaryabhandari282@gmail.com | linkedin.com/in/aishwarya-bhandari-273b89331

SUMMARY

Information Science and Engineering graduate with a strong foundation in Java, SQL, and full-stack web development, seeking to bring analytical problem-solving and collaborative teamwork to TI's Software Development Engineer Development Program. Comfortable ramping quickly on new systems, working across cross-functional teams, and delivering projects on schedule, with hands-on experience through internship and self-driven projects.

TECHNICAL SKILLS

- Programming Languages: Java, Java 8 (Lambda Expressions, Functional Interfaces), SQL
- OOP Concepts: Class, Object, Inheritance, Polymorphism, Abstraction, Encapsulation, Exception Handling, Multithreading (basics)
- Collections Framework: List, Set, Map, ArrayList, HashMap, Iterator
- Database: SQL — Joins, Sub-queries, Grouping, Aggregate Functions, DDL, DML, DCL, TCL, DQL
- Front End: HTML5, CSS, JavaScript
- Tools & Platforms: VS Code, Eclipse, GitHub, MySQL
- Frameworks: Servlets, JSP, Spring Boot, Hibernate
- Soft Skills: Problem-Solving, Analytical Thinking, Cross-Functional Collaboration, Adaptability, Time Management, Initiative

EXPERIENCE

Java Full Stack Developer Intern — Pentagon Space

2025 – Present

- Building hands-on proficiency in Core Java, SQL, and web technologies through structured, project-based internship work.
- Collaborating with mentors and peers to learn industry practices, quickly ramping on new tools and codebases.
- Applying problem-solving and analytical skills to debug, test, and improve application functionality.

PROJECTS

Job Portal — Java Spring Boot

Java, Spring Boot, Hibernate, MySQL

- Developed a full-stack Job Portal enabling administrators to manage the platform, recruiters to post openings, and applicants to apply for roles.
- Designed the relational database schema and implemented backend services using Spring Boot and Hibernate.

Pet Hub — Java Web Application

Java, Servlets, JSP, HTML, CSS, JavaScript, MySQL

- Built a web application helping pet owners manage and track pet care efficiently, from front-end UI to MySQL-backed data storage.

Cow Health Monitoring System — IoT

Python, Arduino Nano, ESP8266, HTML, CSS, React

- Designed an IoT-based system to monitor heart rate and temperature in real time, integrating hardware sensors with a web dashboard.
- Co-authored a related publication, "Cow Health Monitoring System using IoT," IJCT, 2026.

EDUCATION

B.E. in Information Science and Engineering — SDMIT, Ujire

2022 – 2026

CGPA: 8.7 / 10

Second PUC (12th) — Govt Comp PU College, Allanki, Honnavar

2022

Percentage: 86%

SSLC (10th) — Government High School, Allanki

2020

Percentage: 89.6%

CERTIFICATIONS & PUBLICATIONS

- Certificate of Completion, HackerRank — Python basics coding questions, 2025
- Publication: "Cow Health Monitoring System using IoT," IJCT, 2026
